PHONE – (231) 745-2722  
FAX – (231) 745-7214

### **RENEWAL FEE SCHEDULE**

Effective January 4, 2010

All permits expire six months from date of issue. The renewal fees are as follows:

#### **Building, Electrical, Plumbing and Mechanical**

A \$75.00 fee will be charged to extend each said permit for six months. The Building Department will mail a letter informing you that in approximately 30 days your permit will expire on the expiration date. The \$75.00 fee will need to be paid *before* said expiration date. If the \$75.00 fee is not paid, your permit will be expired and closed.

Should you choose to let your permits expire and close, work shall not continue and occupancy cannot be issued. You will need to fill out new applications and pay the full permit fee for each permit you are required to obtain. It will be necessary to obtain all new permits before occupancy can be given.

***It should be noted that work must commence within 180 days from date of issuance of permit. If work is suspended or abandoned for a period of 180 days, and no more than 180 days can laps in between inspections, all permits will become null and void.***

#### **Soil Erosion**

Soil Erosion permits expire one year from date of issue. The full amount of original permit fee shall be paid upon expiration date.
